Public Notice No.

P-2684

Public Notice Date

October 20, 2008

Expiration Date

November 10, 2008

Postmaster Please Post Conspicuously Until:

File Number: MVS-2006-394

Interested parties are hereby notified that an application has been received for a Department of the Army permit for certain work in waters of the United States, as described below and shown on the attached maps.

COMMENTS AND ADDITIONAL INFORMATION: Comments on the described work should reference the U.S. Army Corps of Engineers File Number shown above and must reach this office no later than the above expiration date of the Public Notice to become part of the record and be considered in the decision. Comments should be mailed to the following address:

U.S. Army Corps of Engineers
Regulatory Branch
1222 Spruce Street
St. Louis, Missouri 63103-2833
ATTN: Jaynie Doerr

APPLICANT: Mr. Thomas Rothermich, c/o 14120 Missouri Bottom Road, LLC, 854 Lone Star Drive, O'Fallon, Missouri 63366.

AGENT: Shane Staten, Terra Technologies, 907 Fee Fee Road, Maryland Heights, Missouri 63043.

LOCATION: The project area is located at 14120 Missouri Bottom Road, Bridgeton, Missouri near the intersection of Highway 370 and Earth City Expressway. More specifically, in Section 19, 47 North, Range 5 East, St. Louis County.

PROJECT DESCRIPTION: The applicant seeks authorization to fill approximately 0.60-acres of scrub-shrub wetland and 0.52-acres of emergent wetland to expand their existing facility that receives and stores clean fill from offsite sources. The site expansion will allow for more storage of clean fill material and will increase the ease of onsite transportation, both of which are necessary to continue the site's economic viability. The applicant will only receive clean, solid fill such as uncontaminated soil, rock, gravel, concrete, concrete blocks, cinders and bricks. Furthermore, the location of these wetlands adjacent to large amounts of fill threatens their ecological health and limits their environmental benefit. The applicant has avoided impacts to these wetlands during the course of normal business operations as fill is being stored in all locations on the site outside of wetland areas. A nationwide permit for *Linear Transportation Activities* was verified in the year 2006 for the

construction of an access road via the wetlands in order to minimize impacts to wetland #1. However, after avoiding and minimizing the placement of fill in these wetlands, impacts are now unavoidable in order to maintain economic viability of the site. The applicant proposes to mitigate off-site through the purchase of credits at a wetland mitigation bank. Replacing these wetland functions offsite would be a more stable long-term option for regional water quality. These wetlands are located in the 100-year floodplain of the Missouri River.

LOCATION MAPS AND DRAWINGS: See Attachments 1 and 2.

ADDITIONAL INFORMATION: Additional information may be obtained by contacting Jaynie Doerr, Project Manager, U.S. Army Corps of Engineers, at (314) 331-8581. Your inquiries may also be sent by electronic facsimile to (314) 331-8741 or by e-mail to Jaynie.g.doerr@usace.army.mil.

AUTHORITY: This permit will be processed under Section 404 of the Clean Water Act (33 U.S.C. 1344).

WATER QUALITY CERTIFICATION: The project plans have been submitted to the Missouri Department of Natural Resources, Water Protection Program for state certification of the proposed work in accordance with Section 401 of the Clean Water Act. The certification is requested as of the date of this Public Notice, and if issued, will express the Agency's opinion that the proposed activities will not violate applicable water quality standards. Written comments concerning possible impacts to waters of Missouri should be addressed to: Water Protection Program, Post Office Box 176, Jefferson City, Missouri 65102-0176, with a copy provided to the Corps of Engineers.

SECTION 404 (b)(1) EVALUATION: The impact of the activity on the public interest will be evaluated in accordance with the Environmental Protection Agency guidelines pursuant to Section 404 (b)(1) of the Clean Water Act.

PUBLIC HEARING: Any person may request, in writing, within the comment period specified in this notice, that a public hearing be held to consider the applicant's proposal. Any request for a public hearing shall state, with particularity, the reason for the hearing, and must be based on issues that would warrant additional public review.

ENDANGERED SPECIES: A preliminary determination, in compliance with the Endangered Species Act, as amended, has been made that the work that is proposed would not affect species designated as threatened or endangered, or adversely affect critical habitat. Therefore, no formal consultation request has been made to the United States Department of Interior, Fish and Wildlife Service. In order to complete our evaluation, comments are solicited from the Fish and Wildlife Service and other interested agencies and individuals through this Public Notice.

CULTURAL RESOURCES: The St. Louis District will evaluate information provided by the State Historic Preservation Officer and the public in response to this public notice and we may require a reconnaissance survey of the project area.

EVALUATION: The decision whether to issue a permit will be based on an evaluation of the probable impact including cumulative impacts of the described activity on the public interest. That decision will reflect the national concern for both protection and utilization of important resources. The benefit that may reasonably be expected to accrue from the described activity must be balanced against its

reasonably foreseeable detriments. All factors, which may be relevant to the activity described, will be considered including the cumulative effects. Among factors considered are: conservation; economics; aesthetics; general environmental concerns; wetlands; historic properties; fish and wildlife values; flood hazards; flood plain values; land use; navigation; shoreline erosion and accretion; recreation; water supply and conservation; water quality; energy needs; safety; food and fiber production; mineral needs; consideration of property ownership; and in general the needs and welfare of the people.

SOLICITATION OF COMMENTS: The U.S. Army Corps of Engineers is soliciting comments from the public; Federal, state, and local agencies and officials; Indian Tribes; and other interested parties in order to consider and evaluate the impacts of the proposed activity. Any comments received will be considered by the U.S. Army Corps of Engineers to determine whether to issue, modify, condition or deny a permit for this proposal. To make this decision, comments are used to assess impacts on endangered species, historic properties, water quality, general environmental effects, and other public interest factors listed above. Comments are used in the preparation of an Environmental Assessment and/or an Environmental Impact Statement pursuant to the National Environmental Policy Act. Comments are also used to determine the need for a public hearing and to determine the overall public interest of the proposed activity.

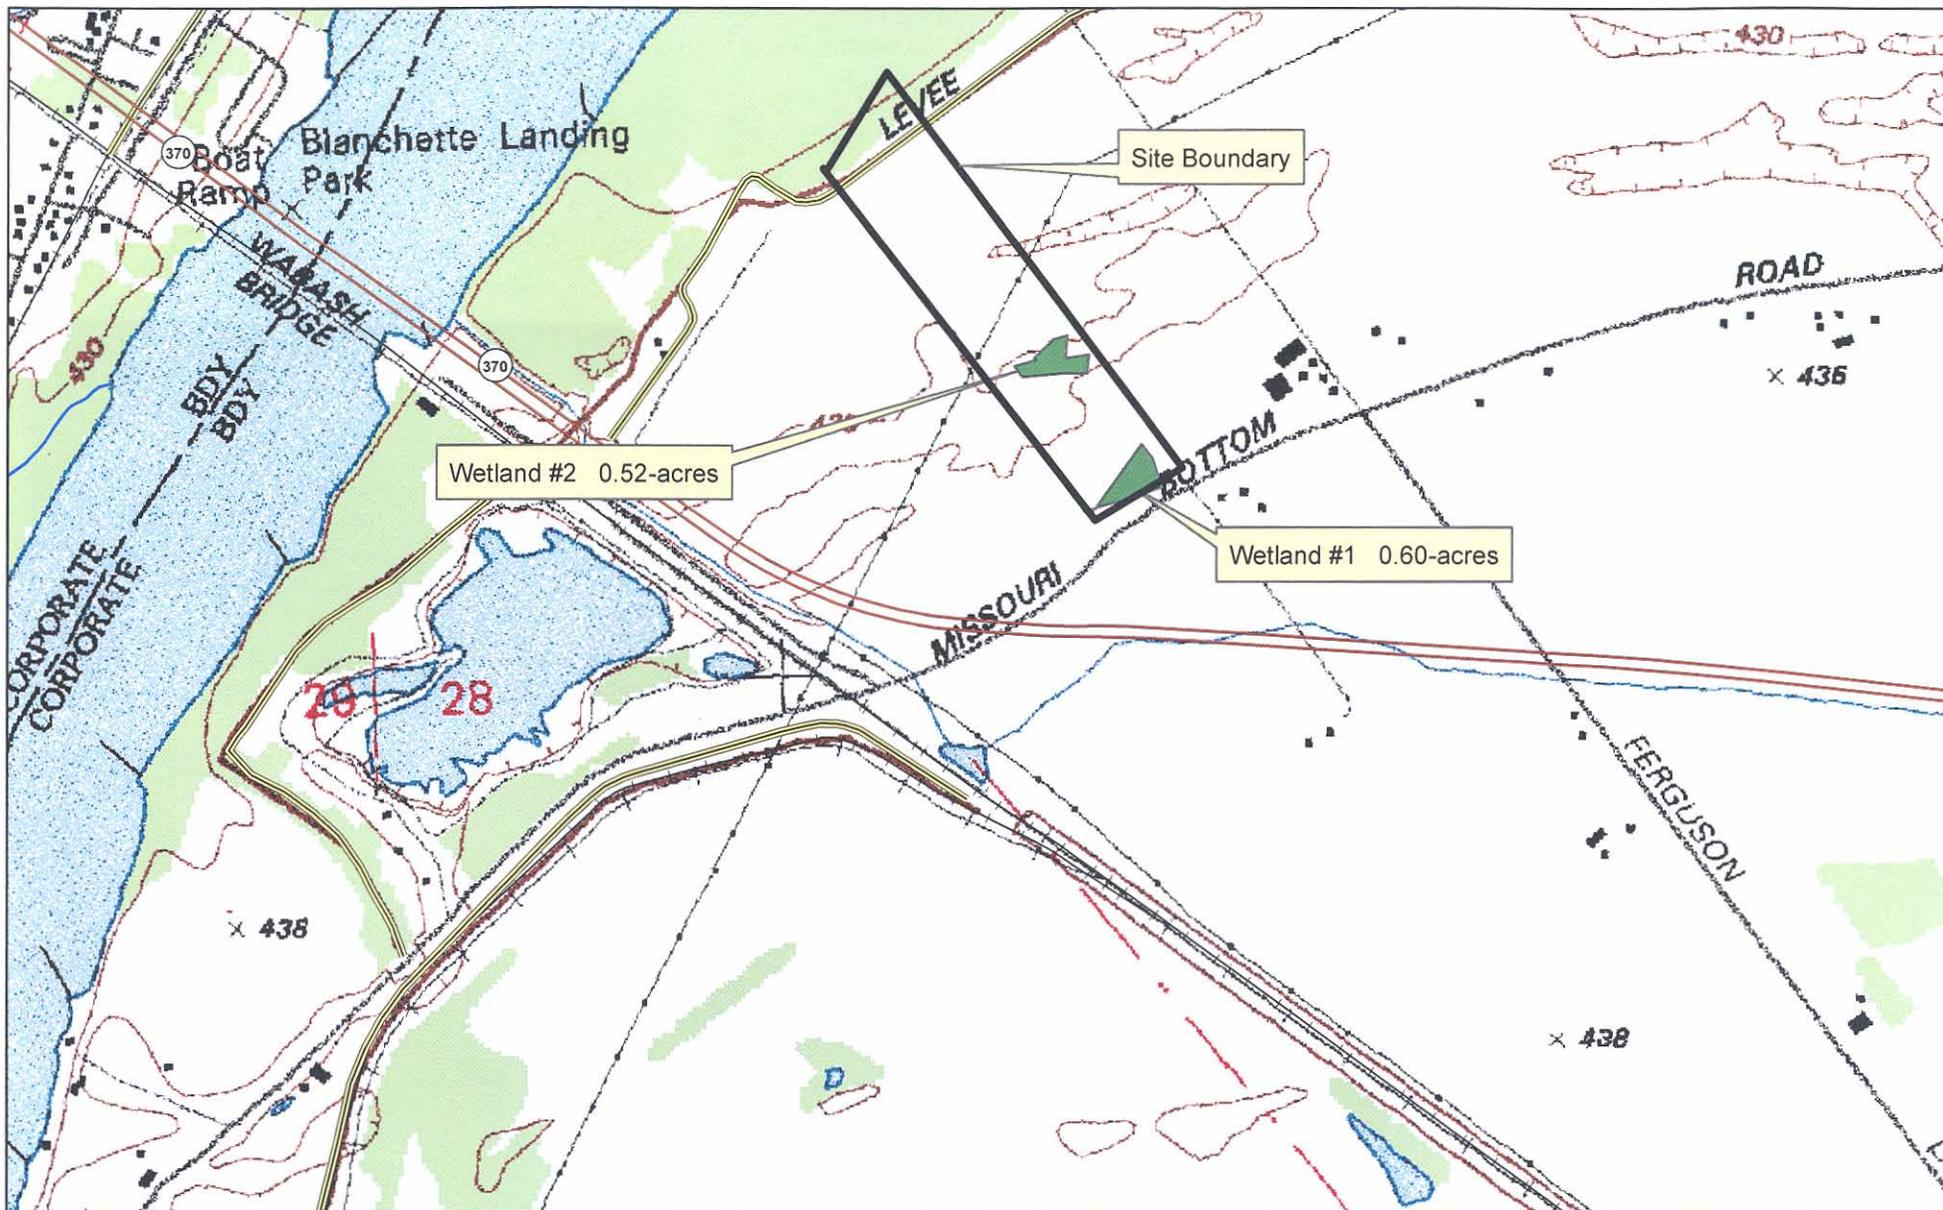

DANNY D. MCCLENDON
Chief, Regulatory Branch
