Mark Twain Lake Environmental Stewardship Forum

Mark Twain Lake---February 14, 2008---The U.S. Army Corps of Engineers will host an Environmental Stewardship forum on February 27, 2008 at 7:00 pm at the Monroe City Senior Nutrition Center in Monroe City, Missouri. All who are interested in the natural resource management goals of Mark Twain Lake are encouraged to attend.

Our Environmental Stewardship mission is to provide a diversified and productive habitat for native populations of wildlife, provide quality outdoor experiences, protection of water and soil resources, and the protection of critical habitats. Though past management efforts have yielded numerous beneficial impacts upon our natural resources, the current budget climate has diminished our capabilities.

The purpose of the forum is an exchange of stewardship ideas, and to explore partnering opportunities with interested individuals or groups. In the past, we have participated in many partnering efforts with different entities in the pursuit of common endeavors. It is our hope to expand our current partnerships, or foster new initiatives with groups that share our same passion and commitment to responsible public land stewardship.

Please RSVP Allen Mehrer at (573) 735-4097 by February 25, if you can attend. We hope to see you at the forum.
