## Partners

### Water Safety On Wheels

Ren Potterfield Trucking from Monroe City, Missouri and the U.S. Army Corps of Engineers at Mark Twain Lake partnered to spread the word about safe water recreation. What better way to tell the Eastern half of the United States about the Mark Twain Lake region than on the side or back of a Potterfield truck! What makes this sign so special? Most people don't expect to see a water safety message zipping past them at 55 mph. Maybe this slogan will stick in their mind and lives will be saved. Thanks to Potterfield Trucking for spreading the word.
