**WATERWAY:** UPPER MISSISSIPPI

**EFFECTIVE:** 07/23/2019 07:00 thru Until Further Notice CST

**CHANNEL MAINTENANCE DREDGING UPDATE  
USACE Dredge Potter  
Upper Mississippi River mile 0 - 300**

1. Commencing on 23 July 2019 and continuing until further notice, the US Army Corps of Engineers Dredge Potter will perform channel maintenance dredging at various locations on the Upper Mississippi River from mile 0 to 300.0
2. The Dredge Potter is on schedule to complete work at mile 243 UMR late this evening (26 July). The next work assignments will be upstream at mile 253.5, 255.0 and 263.0 UMR, with approximate dates shown below. Additional updates will be provided as work progresses.
  - a. Eagle Island, 253.5 UMR, 28 July - 01 Aug
  - b. Kelly Island, 255.0 UMR: 01 Aug - 04 Aug
  - c. Tisdell Towhead, 263.0 UMR: 05 Aug - 08 Aug
3. The Dredge Potter and its attendant plant, to include tender boats, small boats, barges and pipeline, etc., work 24 hours a day, 7 days a week. When dredging, removed material is pumped through a pontoon pipeline or self-floating pipeline, which may be crossing the channel, and is placed outside of the navigation channel. Mariners should be on the lookout for tender boats, barges, small survey boats, and pipeline when transiting the dredge area.
4. The Dredge Potter may be contacted on VHF-FM radio channels 13 and 16. Mariners are urged to transit at their slowest safe speed to minimize wake and proceed with caution after passing arrangements have been made with the Dredge Potter.

**FOR THE DISTRICT ENGINEER:**
