SPECIAL NOTICE TO NAVIGATION INTERESTS

Lock and Dam No. 25, Upper Mississippi River Mile 241.4

1. Following several issues with Southbound cuts at Lock and Dam No. 25, all navigation interests are reminded to be extremely cautious when moving the first cut from the lock chamber during a double lockage. Strong outdraft currents are present during these times of high flows. The lockmaster has advised that all tow personnel start checking their first cut 100' inside the lock chamber as cuts have been picking up speed as they move past the lower miter gates.
2. All navigation interest should be alert for, and abide by, any special instructions that may be issued by the Lockmaster in conjunction with this caution.

FOR THE DISTRICT ENGINEER:
