ADDITIONAL INFORMATION SUPPORTING NJD (e.g., paragraph 1 – site conditions; paragraphs 2-3 – rationale used to determine NJD, including information reviewed to assess potential navigation or interstate commerce connections; and paragraph 4 – site information on waters of the U.S. occurring onsite): **The pond was constructed in a small portion of an existing depressional area. The pond collects water from an adjacent storm sewer and does not appear to overflow into another water of the U.S. There does not appear to be a hydrologic connection to a water of the U.S. The wetland also does not appear to overflow into another water of the U.S. and there does not appear to be a hydrological connection to a water of the U.S.**
