OPTIONAL ADDITIONAL INFORMATION SUPPORTING NJD (e.g., discussion may include information reviewed to assess potential navigation or interstate commerce connections - 1 to 3 paragraphs): The 0.11-acre pond which now contains characteristics of an emergent wetland was created by diking dry land to collect or retain water. The impounded area now contains emergent wetland characteristics but lacks a hydrologic connection with nearby tributaries, and is located outside of any floodplain areas. Therefore, the 0.11-acre wetland lacks a hydrologic connection to waters of the United States or interstate commerce and is considered isolated.
