P-2507
Public Notice Date
April 19, 2006
Expiration Date
May 09, 2006**

Postmaster Please Post Conspicuously Until:

File Number: MVS-2005-45215

Interested parties are hereby notified that an application has been received for a Department of the Army permit for certain work in waters of the United States, as described below and shown on the attached maps.

COMMENTS AND ADDITIONAL INFORMATION: Comments on the described work should reference the U.S. Army Corps of Engineers File Number shown above and must reach this office no later than the above expiration date of the Public Notice to become part of the record and be considered in the decision. Comments should be mailed to the following address:

U.S. Army Corps of Engineers
(Regulatory Branch)
1222 Spruce Street
St. Louis, Missouri 63103-2833
ATTN: Alan Edmondson

APPLICANT: Gordon & Price, Inc., 905 W. DeYoung Street, P.O. Box 1652, Marion, Illinois, 62959.

LOCATION: The project is located on the left descending bank of Mississippi River mile 85.6, Jackson County, Illinois. Specifically, the project is located on the Altenburg USGS quadrangle map, latitude 37:42:13.6450, longitude -89:31:58.5243, between Mississippi River Miles 84 and 87.

PROJECT DESCRIPTION: The applicant requests permission to conduct sand and gravel dredging operations at the above listed river miles, as well as maintenance dredging at the company's loading/offloading facility in Jackson County, Illinois. Approximately 10 years ago the applicant was permitted to conduct maintenance dredging operations. (P-1631) The previous permit authorized approximately 15,000 cubic yards to be placed in authorized coal storage structures onsite. The company has not performed maintenance dredging or commercial dredging since that time. The fleeting area has silted in due to the absence of a maintenance dredging program. To start up commercial dredging operations, the applicant needs a permit to dredge an area 1000 feet long and 40 feet wide using a small suction dredge which will have a 6 or 8 inch pipe. The material will be pumped through the pipe to the old existing dredge disposal area at the top of bank and above the ordinary high water mark, therefore the project does will not trigger the need for 401 Water Quality Certification.

LOCATION MAPS AND DRAWINGS: See attached.

ADDITIONAL INFORMATION: Additional information may be obtained by contacting Alan Edmondson, Project Manager, U.S. Army Corps of Engineers, at (314) 331-8811. Your inquiries may also be sent by electronic facsimile to (314) 331-8741 or by e-mail to *Alan.Edmondson@mvs02.usace.army.mil*.

AUTHORITY: This permit will be processed under the provisions of Section 10 of the Rivers and Harbors Act of 1899 (33 U.S.C. 403).

SECTION 404 (b)(1) EVALUATION: The impact of the activity on the public interest will be evaluated in accordance with the Environmental Protection Agency guidelines pursuant to Section 404 (b)(1) of the Clean Water Act.

PUBLIC HEARING: Any person may request, in writing, within the comment period specified in this notice, that a public hearing be held to consider the applicant's proposal. Any request for a public hearing shall state, with particularity, the reason for the hearing, and must be based on issues that would warrant additional public review.

ENDANGERED SPECIES: A preliminary determination, in compliance with the Endangered Species Act, as amended, has been made that the work that is proposed would not affect species designated as threatened or endangered, or adversely affect critical habitat. Therefore, no formal consultation request has been made to the United States Department of Interior, Fish and Wildlife Service. In order to complete our evaluation, comments are solicited from the Fish and Wildlife Service and other interested agencies and individuals through this Public Notice.

CULTURAL RESOURCES: The St. Louis District will evaluate information provided by the State Historic Preservation Officer and the public in response to this public notice and we may require a reconnaissance survey of the project area.

EVALUATION: The decision whether to issue a permit will be based on an evaluation of the probable impact including cumulative impacts of the described activity on the public interest. That decision will reflect the national concern for both protection and utilization of important resources. The benefit that may reasonably be expected to accrue from the described activity must be balanced against its reasonably foreseeable detriments. All factors, which may be relevant to the activity described, will be considered including the cumulative effects. Among factors considered are: conservation; economics; aesthetics; general environmental concerns; wetlands; historic properties; fish and wildlife values; flood hazards; flood plain values; land use; navigation; shoreline erosion and accretion; recreation; water supply and conservation; water quality; energy needs; safety; food and fiber production; mineral needs; consideration of property ownership; and in general the needs and welfare of the people.

SOLICITATION OF COMMENTS: The U.S. Army Corps of Engineers is soliciting comments from the public; Federal, state, and local agencies and officials; Indian Tribes; and other interested parties in order to consider and evaluate the impacts of the proposed activity. Any comments received will be considered by the U.S. Army Corps of Engineers to determine whether to issue, modify, condition or deny a permit for this proposal. To make this decision, comments are used to assess impacts on endangered species, historic properties, water quality, general environmental effects, and other public interest factors listed above.

Comments are used in the preparation of an Environmental Assessment and/or an Environmental Impact Statement pursuant to the National Environmental Policy Act. Comments are also used to determine the need for a public hearing and to determine the overall public interest of the proposed activity.

DANNY D. MCCLENDON
Chief, Regulatory Branch
