

Sandbag Filling Service

Granite Construction I-80 Project, Truckee, CA

Our ability to produce sandbags on site with our proprietary sandbagging machine cuts your erosion control costs dramatically

- Production of up to 4,000 bags per shift
 - Fill material – sand through 1" rock
 - Bags are sewn closed for better stacking
- Work performed right at site – eliminates trucking costs
- Minimum orders as low as 1000 bags. No maximum.
 - Customer can supply fill material or we can
- Premises and General Liability insurance coverage

Standard Pricing for Customer Supplied fill material and loader:

14x26 Polypro Bags = \$.59 each

14 x 26 Burlap Bags (8.9 ounce, 11x11 weave)= \$.80 each

Standard Pricing for Ensor Supplied loader and material varies with job size, fill material cost, and location of job. Price breaks at 20k, 50k and 100k bags.

A yellow Ensor Equipment sandbagging machine is mounted on a trailer. The machine has "ENSOR EQUIPMENT" and "MODEL A" printed on it. It is parked on a dirt surface next to a large pile of white sandbags. In the background, there is a body of water and some trees under a blue sky.
