

U. S. Army Corps of Engineers Mandatory Center of Expertise for the Curation and Management of Archaeological Collections (MCX CMAC)

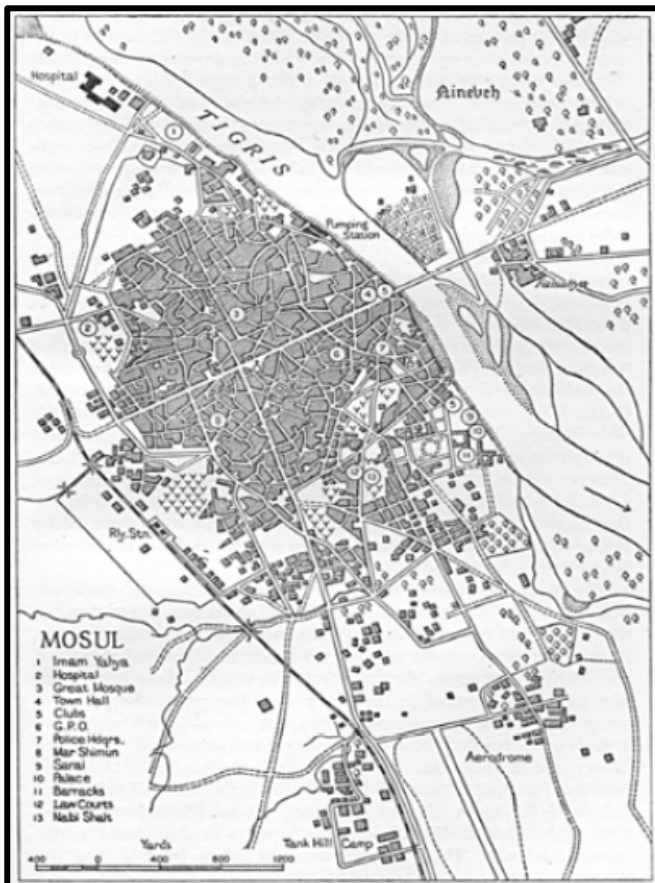

Archival Research (Intelligence-Based)

Background

MCX CMAC staff are trained to conduct archival research on virtually any topic of interest. They have the capability to provide on-site historical, archaeological, and cartographic research including:

- Intel-based cartographic research
- Archaeological/heritage asset management
- Mapping and GIS integration

Libraries, archival repositories, and records centers around the world hold a wealth of knowledge for researchers to discover, including information about the landscape and culture of other nations.

Services Offered

- Identification of repositories holding pertinent topical information
- Coordination with repositories for the transfer of documents in their holdings
- Travel to repositories to gather documents and pertinent data
- Analysis and arrangement of documents and data in a logical order (based upon the customer's retrieval requirements)
- Development of a retrieval system enabling customers to efficiently access the information compiled during research
- Providing documents and data in electronic formats, as well as in traditional paper formats (e.g., photographs and maps)

MCX CMAC is located at the St. Louis District of the U. S. Army Corps of Engineers.
