Mr. David Adler
FUSRAP St. Louis Site Manager
Former Sites Restoration Division
U.S. Department of Energy
Oak Ridge Operations
P.O. Box 2001
Oak Ridge, TN 37831-8723

Dear Mr. Adler:

As a follow up to our telephone conversation on Friday July 20, 1995, I would like to reiterate our intent to support identification or clarification of the impacts to surface and groundwater resulting from the radioactive waste at the St. Louis Airport Site. As you are aware our staff have worked extensively with you and the Department of Energy, along with our Division of Geology and Land Survey to characterize and assess both current and future scenarios and the resulting impacts to the water.

You indicated that a "Blue Ribbon Panel" of experts in geology or hydrology is being considered by the Interim Priorities Work Group of the St. Louis Site Remediation Task Force to evaluate this issue. If our agency can be of assistance as panel members or facilitators to provide input, we welcome the opportunity.

If you desire our participation, please provide in writing both the scope of the issue to be discussed or resolved, and those individuals requested to participate. By outlining the details of each, we can provide the appropriate level of input in order to obtain timely results.

We look forward to your request. If you have any questions please feel free to contact me at (314) 751-3176.

Sincerely,

HAZARDOUS WASTE PROGRAM

Robert Geller
