MISSOURI SITES-EPA DRAFT FEASIBILITY STUDY-ENVIRONMENTAL IMPACT STATEMENT (FS-EIS) AND PROPOSED PLAN (PP) FOR THE ST. LOUIS SITE, JULY 1993 PLUS ASSOCIATED DOCUMENTS

Dear Mr. Wall:

Enclosed is a copy of the following documents:

- July version of FS-EIS
- July version of PP
- DOE Comment Response to the EPA May 19, 1993 Comments on the February 1993 Draft Feasibility Study and Proposed Plan for the DOE St. Louis FUSRAP Site
- Risk Assessment entitled: The Risks Associated with Contaminated Sediments Present in Coldwater Creek
- Modeling Report on: Groundwater Flow and Transport Model for the Airport Area
- DOE Comment Response to the EPA February 11, 1993 Comments on the December 1992 Draft Field Sampling Plan and Letter Report on the Scope for the Sampling of Existing Coldwater Creek Sediment Cores

Copies of these documents are also being forwarded directly to Mr. Hickman. The following documents were given to you and Mr. Hickman at the July 7 meeting (DOE transmittal letter dated July 6, 1993):

- Evaluation of Contaminated Sediment Transport in Coldwater Creek, St. Louis, Missouri, July 1993
- Site Suitability Study for the St. Louis Airport Site, St. Louis, Missouri, July 1993

We have endeavored to resolve your May 19 comments in accord with the discussions we had at the July 7 meeting. To help in your review of the July version of the FS-EIS, which is a large document, revision bars have been placed in the text margin to show where text was changed from the February version. These revision bars will be removed in the next revision.

DOE's intent is to keep the Proposed Plan at a level friendly to the lay person. Revisions to the Proposed Plan reflective of your comments were made with this intent in mind. Thus the technical detail provided in the FS-EIS and Response to Comments was not carried forward to the Proposed Plan.

In your May 19 letter you mentioned pending comments from legal council. Would you please advise me of the status of this review. I look forward to working with you in keeping our joint on-schedule progress apace on the St. Louis Site remediation project.

Sincerely,

David G. Adler, Missouri Site Manager
Former Sites Restoration Division

Enclosure

cc w/enclosure: David Bedan (5 copies of Site Suitability Study also enclosed)
 Mimi Garstang (1 copy of Site Suitability Study)
 Herb Hickman
