**Subject:** remove our waste

I am not able to be at the public meeting on May 29 but want to register my concern over the proposed plan and feasibility study for the St.

Louis

North County Site.

It is imperative that depleted uranium not be ignored by the federal government, especially at a time when all nuclear policies are under review. We in St. Louis have been long subjected to the dangers of nuclear

waste, being the first location in the U. S. to have to stored it since the middle of the last century and that on an urban flood plain.

A start has been made on cleanup but we urge the Corps to finish the job

begun by the department of energy and remove all the radioactive waste from the sites that have been identified.
