Formerly Utilized Sites Remedial Action Program Project Office

Mr. Mike Prange  
Lutheran North High School  
5401 Lucas and Hunt Road  
St. Louis, Missouri 63121

Dear Mr. Prange:

The purpose of this letter is to offer the experience and expertise of professionals from the U. S. Army Corps of Engineers, St. Louis District as guest speakers to supplement your students' studies and encourage career exploration.

The Corps of Engineers is performing an environmental cleanup in the St. Louis area to remove low-level radioactive contamination generated by activities of the Manhattan Engineer District/Atomic Energy Commission (MED/AEC) during the development of atomic weapons in the 1940's and 50's. Contamination is being removed from these sites under a Congressionally funded program called FUSRAP (Formerly Utilized Sites Remedial Action Program).

A significant aspect of this program is our ability to reach out to the community and inform them how we are making the community a better place to live in. Our project requires a wide-range of talents from diverse fields such as project managers, geologists, chemists, risk assessors and physicists to construction managers, engineers and laborers.

Our site personnel are available to assist your school by presenting students with perspectives of their careers in management, engineering, math and/or science. If you are interested in scheduling a guest speaker for a group or for a class, please contact Ms. Jacqueline Mattingly at (314) 524-3364 or Mr. Lou Dell'Orco at (314) 524-6857. Be sure to leave the best time to return your call.

Sincerely,

A handwritten signature in cursive script that reads "Sharon Cotner".

Sharon Cotner  
FUSRAP Program Manager
