**RE: Engineering Evaluation/Cost Analysis
For the Hazelwood Interim Storage Site ("HISS")**

Dear Mr. Haskell:

Stone Container Corporation requests that the Corps of Engineers correct a couple of errors contained within the Summary of Activities and the Engineering Evaluation pertaining to HISS. Both documents mistakenly assert that the property directly east of HISS is owned by Stone Container Corporation. Please be advised that the owner of such property is the General Investment Funds Real Estate Holding Company ("GIFREHC"). GIFREHC leases the property to Stone Container. It was GIFREHC that expanded the facility and whose contractor created the stockpile of approximately 8000 cubic yards of contaminated soil. Throughout the Summary of Activities and the Engineering Evaluation, such stockpile is referred to as the "Stone Container Pile". Referring to the stockpile as the Stone Container Pile creates a negative image of Stone Container which we prefer not be projected to our customers in the St. Louis area. Those documents are used as sources by the media thereby compounding the false information and negative image. Because the subject pile was created on behalf of GIFREHC on property owned by GIFREHC, we request that all future references to the stockpile be known as the "GIFREHC Stockpile".

Please call me so that we can discuss this matter further. My telephone number is 312/580-3492.

Very truly yours,

Timothy P. Davisson
Attorney
