October 26, 2002

Gentlemen,

According to friends, Channel 5, KSDK, a St Louis MO TV station aired a news story this past Tues. or Wednesday (Oct. 22 or 23) about new developments regarding the employees who worked for Mallinckrodt Chemical Works at the Weldon Springs MO Uranium plant in the early 1960's.

I was employed as a Lab Technician in the Research Lab there from it's opening in June 1957. Prior to that I worked at MCW's research lab in downtown St Louis and I am concerned about the radiation exposure I received during this time.

Could you let me know what is happening, that the media would devote air time to? Or whom to contact regarding this?

Thank you,

Earl A Hancock
