Summary of June 13, 2003 Meeting

Committee Members Present: Tom Binz, Sally Price, Jim Grant, Ric Cavanagh

Other Interested Parties: Jacqueline Mattingly, Brett Blume, Lou Dell'Orco, Sharon Cotner, Michelle Morgenstern, Eric Gilstrap, Larry Erickson, Laura Madden

The following comments are in addition to the information provided by USACE staff at the meeting.

Page 6 – Water is still being treated to meet standards. Treatment of Se will work better in warmer, drier summer weather.

Congress recently authorized an additional \$5 million for FUSRAP. From that amount, \$1 million will be committed to SLAPS (since the priority is to complete projects that are already underway).

Page 7 – The “Legacy Office” will handle Long Term Stewardship for DOE. Its office will still likely be in Grand Junction, Colorado. The Oversight Committee will request a briefing on this reorganization in the fall.

Page 9 – Discussion of Public Hearing. Document with comments won't be available until early 2004. Frequently asked questions will be answered and sent to people who attended.

The Committee discussed the issue of West Lake Landfill. While the site is not currently in FUSRAP, what should the Committee do to get this site on the political agenda? DOE is really a minor player in this issue. Dan Wall of EPA is the point person at this time.

The Committee would like to have the opportunity to meet at a time outside of the regular meeting to wrestle with some of these remaining issues. The Committee Chair will try to contact members by e-mail to make arrangements for such a meeting.
