The following comments are in addition to the handouts provided by USACE at the meeting.

Page 5 – Coldwater Creek should be done by 8/20. Crews are working two, ten hour shifts daily, seven days/week. Some soil and debris in creek are questionable. They are being evaluated prior to disposal.

Page 7 – VP 13 which is just adjacent to SLAPS has been seeded and completed.

Page 9 – There is a question as to whether the new DOT regulations apply to that which is enroute or only to newly dug soil. The problem with intermodals is that they are harder work with and harder to get. The current condolas are on a long term lease.

Additional comments:

1. A representative from Senator Talent's office will tour the sites August 11.
2. The Assistant Secretary of the Army for Civil Works will tour the sites on September 1.
3. No additional funds have been received year to date, and it is unlikely that we will get any this fiscal year.
4. It is likely that the federal budget will again be under a CRA (continuing resolution authorization) through March.
