

**ST. LOUIS DOWNTOWN SITE
ACCESSIBLE SOILS OPERABLE UNIT
1998 RECORD OF DECISION
FORMERLY UTILIZED SITES REMEDIAL ACTION PROGRAM**

ADMINISTRATIVE RECORD INTRODUCTION

The documents contained in this administrative record (AR) were compiled by the U.S. Army Corps of Engineers (USACE) to identify appropriate remedial activities for use at the St. Louis Downtown Site Accessible Soils Operable Unit under the Formerly Utilized Sites Remedial Action Program (FUSRAP). The AR reflects documents considered or relied upon in selecting the response action for contamination at the site. The AR also serves as a vehicle for public participation in selecting the response action. Documents reflecting this involvement are included in the AR.

The AR index (Attachment 1) is sorted by filename. The filename is an alpha-numeric identification code unique to each document and is located on the first page of the document in the lower right-hand corner.

The AR was developed in accordance with the Comprehensive Environmental Response Compensation, and Liability Act (CERCLA) and USACE's FUSRAP Records Management Protocol and Quality Control Plan. A review of the file for information protected by privilege, Privacy Act, or personally identifiable information was completed and applicable redactions were applied to the electronic images.
