St. Ann, Missouri 60374

Attention: Betsy Miller, Regulatory Support Specialist
SAIC - St. Louis Site

Subject: Retrieval of SLDS Validated Data From Bechtel's Project Document Control Center

Dear Ms. Miller:

The purpose of this letter is to respond to your request for information regarding the effort involved in retrieving the archived data from sampling campaigns conducted by Bechtel at the St. Louis Downtown Site (SLDS). Based on information collected from our Project Document Control Center (PDCC) in Oak Ridge, there are approximately 1500 data packages from sampling events conducted by Bechtel at SLDS that date from late 1987 to present. Each package has approximately 100 pages of data and validation information. A majority of this information is currently stored in boxes at the Bechtel Oak Ridge Warehouse.

It is estimated that it would take approximately 600 hrs for support personnel to retrieve, sort, copy, and shipped this information to the St. Louis Site Office. The total cost of this effort is approximately \$ 30,000 and will take two months to complete. This cost would be incurred as a direct charge to the USACE St. Louis District.

We will be happy to retrieve the requested information once an official request is received and approval is granted by our USACE Contracting Officer Representative (COR), Mike Feldmann. Please contact me at 524-7346 if you have questions regarding the retrieval of this documentation.

Sincerely,

W. F. Johnson
Project Manager - FUSRAP
