

# Missouri Department of Natural Resources Oversight Activities

---

Daniel Carey, Hazardous Waste Program

# Agency Roles

- The United States Army Corps of Engineers is responsible for the active remediation of FUSRAP sites
- EPA is responsible for primary regulatory oversight of FUSRAP

# Agency Roles (cont.)

- Missouri Department of Natural Resources has a secondary oversight role for FUSRAP sites located in this state
- Missouri Department of Health and Senior Services helps the department fulfill our secondary oversight role

# MoDNR Staff Roles

- Liaison between the Corps and state government
- Review and provide comments on Corps draft documents (work plans, sampling investigation reports, post-remedial action reports, environmental monitoring reports)
- Attend prep meetings and provide input on state law and regulations (pre-remediation and pre-sampling)

# MoDNR Staff Roles (cont.)

- Collect split samples with the Corps during environmental monitoring and investigations for verification

Coldwater Creek Surface Water and Sediment Split Sampling

# MoDNR Roles (cont.)

Site Wide Groundwater Monitoring  
Split Sampling

# MoDNR Roles (cont.)

Soil split sampling with Corps contractors  
Florissant Gardens Shopping Center

# MoDNR Roles (cont.)

Collection of surface water split sample  
Ball Fields Area

# MoDNR Roles (cont.)

- Conducts composite sampling of completed survey units for state verification of remediation

MoDNR composite sampling of a completed survey unit at Duchesne Park

# MoDNR Roles (cont.)

MoDNR composite sampling of a completed survey unit in the  
Destrehan Street Remediation Area at St. Louis Downtown Site

# MoDNR Roles (cont.)
