**HIGH WATER LOCK CLOSURE
Jerry Costello Lock and Dam**

1. All navigation interests are advised that Jerry Costello Lock and Dam will be closed starting Saturday July 11, 2015 due to high river stages.
2. This closure is necessary due to the current river stages exceeding EL 380 NGVD. At that elevation, water enters the Miter Gate machinery recesses and prevents movement of the miter gates. The lock will remain closed until water recedes below EL 380 NGVD.
3. All navigation interests should be alert for, and abide by, any special instructions that may be issued by the Lockmaster.
