Notice CST

ROCK REMOVAL DREDGING UPPER MISSISSIPPI RIVER, MILE 46 - 38

1. Due to recent rain events, the long range forecast for the Mississippi River at Cape Girardeau indicates that river levels will not be below 15-feet until mid-September. We will continue to monitor the forecasts and update the NTNI as more information becomes available.
2. USACE contractor, Massman Construction, will be working with two separate floating plants, consisting of barge mounted excavators between miles 46 and 38 UMR.
3. Massman Construction will be working from 07:00 to 19:00 hours, 7 days a week.
4. USCG will organize test tows to determine safe passage requirements during working hours.
5. Safe passage arrangements can be made by calling Massman Construction's contact vessel, MV Keith Jacobsen, on VHF channel 13, prior to transiting the area.
6. For additional information regarding Rock Removal floating plant activity, please contact the Area Engineer, Jeff Derrick at 573-204-7770. For overall Project information, please contact Project Manager Mike Rodgers, 314-331-8215.
