CHANNEL MAINTENANCE DREDGING
Kaskaskia River miles 28.5 to 36

Kaskaskia River Project – The U.S. Army Corps of Engineers will be performing maintenance dredging on the main river channel of the Kaskaskia River from mile 28.5 at New Athens, IL to mile 36 at Fayetteville, IL. Dredging is scheduled to begin on October 16th at Fayetteville and will continue downstream to New Athens through the end of November, and will be weather dependant. Channel dredging is required to maintain a 9 foot deep channel to provide navigation capabilities, recreational opportunities, and promote economic growth to the area.

To provide public safety during dredging operations, sections of the main river channel will be temporarily closed. Signage at the Fayetteville and New Athens Boat Ramps will indicate the river miles impacted during these closures.

For more information, please contact the Kaskaskia River Project Office at (618) 284-7160 or e-mail at KaskyL&D@usace.army.mil
