SAFETY ADVISORY
Lock & Dam 25, UMR Mile 241.4

1. A timber is missing on the #4 upper I-wall miter gate protecting the tensioning box/bar. Due to high river levels we are unable to repair at this time, but have installed temporary protection. Repairs will be performed when river levels allow.
2. Tows should exercise caution when transiting the lock, recommend favoring the Missouri side of the lock chamber when on South approach and exiting North bound.
3. All navigation interest should be alert for, and abide by, any special instructions that may be issued by the Lockmaster.
