**EFFECTIVE:** 07/27/2018 07:23 thru Until Further  
Notice CDT

**CHANNEL MAINTENANCE DREDGING  
USACE Dredge Potter  
Upper Mississippi River mile 0 - 300**

1. Commencing on 27 July 2016 and continuing until further notice, the US Army Corps of Engineers Dredge Potter will perform channel maintenance dredging at various locations on the Upper Mississippi River from mile 0 to 300.0.
2. The first three assignments will be in Mel Price Pool, between miles 221 and 227 UMR. The below schedule is approximate and may change depending on progress of work. Additional dredging assignments will be scheduled and updates will be provided.
  - a. Mile 221.5 UMR: 27 July - 1 August
  - b. Mile 223.5 UMR: 2 - 4 August
  - c. Mile 227 UMR: 5 - 6 August
3. The Dredge Potter and its attendant plant, to include tender boats, small boats, barges and pipeline, etc., work 24 hours a day, 7 days a week. When dredging, removed material is pumped through a pontoon pipeline or self-floating pipeline, which may be crossing the channel, and is placed outside of the navigation channel.
4. The Dredge Potter may be contacted on VHF-FM radio channels 13 and 16. Mariners are urged to transit at their slowest safe speed to minimize wake and proceed with caution after passing arrangements have been made with the Dredge Potter.
