**LOCAL NUMBER:** 19-03B  
**WATERWAY:** UPPER MISSISSIPPI

**EFFECTIVE:** 02/03/2019 06:00 thru Until Further  
Notice CDT

**CHANNEL MAINTENANCE DREDGING - RESUMED**  
**USACE Dredge Potter**  
**St. Louis District**

1. The Dredge Potter is currently working above the Jefferson Barracks Bridge, in the vicinity of mile 169 UMR. Additional assignments will be performed at mile 171, 173 and other locations pending survey results.
2. The Dredge Potter and its attendant plant, to include tender boats, small boats, barges and pipeline, etc., work 24 hours a day, 7 days a week. When dredging, removed material is pumped through a pontoon pipeline or self-floating pipeline, which may be crossing the channel, and is placed outside of the navigation channel.
3. The Dredge Potter may be contacted on VHF-FM radio channels 13 and 16. Mariners are urged to transit at their slowest safe speed to minimize wake and proceed with caution after passing arrangements have been made with the Dredge Potter.
4. Additional updates will be provided as work progresses.

**FOR THE DISTRICT ENGINEER:**
