NOTICE NUMBER: 10601
LOCAL NUMBER: 19-17
WATERWAY: UPPER MISSISSIPPI

EFFECTIVE: 07/23/2019 07:00 thru Until Further Notice CST

**CHANNEL MAINTENANCE DREDGING
USACE Dredge Potter
Upper Mississippi River mile 0 - 300**

1. Commencing on 23 July 2019 and continuing until further notice, the US Army Corps of Engineers Dredge Potter will perform channel maintenance dredging at various locations on the Upper Mississippi River from mile 0 to 300.0
2. The Dredge Potter has departed the St. Louis District Service Base this morning and is in transit to its first assignment, which will be just upstream of Lock 25, at mile 243 UMR. The Dredge Potter should arrive late this evening, and work at this location should be complete on or about 27 July. Additional dredging assignments will be scheduled and updates will be provided.
3. The Dredge Potter and its attendant plant, to include tender boats, small boats, barges and pipeline, etc., work 24 hours a day, 7 days a week. When dredging, removed material is pumped through a pontoon pipeline or self-floating pipeline, which may be crossing the channel, and is placed outside of the navigation channel. Mariners should be on the lookout for tender boats, barges, small survey boats, and pipeline when transiting the dredge area.
4. The Dredge Potter may be contacted on VHF-FM radio channels 13 and 16. Mariners are urged to transit at their slowest safe speed to minimize wake and proceed with caution after passing arrangements have been made with the Dredge Potter.
