CHANNEL MAINTENANCE DREDGING UPDATE 6 AUG 2019

**USACE Dredge Potter
Upper Mississippi River mile 0 - 300
Illinois Waterway 0 - 80**

1. Commencing on 23 July 2019 and continuing until further notice, the US Army Corps of Engineers Dredge Potter will perform channel maintenance dredging at various locations on the Upper Mississippi River from mile 0 to 300.0
2. The Dredge Potter has completed Eagle Island, mile 253.5 UMR, Kelly Island 255.0 UMR, and will finish up Tisdell Towhead, mile 263 UMR this evening. The Dredge Potter will start work tomorrow near Grafton, IL between miles 218 and 223 UMR for approximately 10 days (7 Aug - 16 Aug 2019).
3. The Dredge Potter and its attendant plant, to include tender boats, small boats, barges and pipeline, etc., work 24 hours a day, 7 days a week. When dredging, removed material is pumped through a pontoon pipeline or self-floating pipeline, which may be crossing the channel, and is placed outside of the navigation channel. Mariners should be on the lookout for tender boats, barges, small survey boats, and pipeline when transiting the dredge area.
4. The Dredge Potter may be contacted on VHF-FM radio channels 13 and 16. Mariners are urged to transit at their slowest safe speed to minimize wake and proceed with caution after passing arrangements have been made with the Dredge Potter.
