WATERWAY: UPPER MISSISSIPPI

EFFECTIVE: 07/07/2020 07:00 thru Until Further Notice CST

CHANNEL MAINTENANCE DREDGING
USACE Dredge Potter
Upper Mississippi River mile 0 - 300

1. Commencing on 7 July 2020 and continuing until further notice, the US Army Corps of Engineers Dredge Potter will perform channel maintenance dredging at various locations on the Upper Mississippi River from mile 0 to 300.0.
2. The Dredge Potter will be mobilizing to Manskers, mile 103 UMR on 9 September 2020. Work at this location is expected to be complete on 17 September. The following assignments are scheduled to be between mile 174 and 168 UMR.
3. The Dredge Potter and its attendant plant, to include tender boats, small boats, barges and pipeline, etc., work 24 hours a day, 7 days a week. When dredging, removed material is pumped through a pontoon pipeline or self-floating pipeline, which may be crossing the channel, and is placed outside of the navigation channel. Mariners should be on the lookout for tender boats, barges, small survey boats, and pipeline when transiting the dredge area.
4. The Dredge Potter may be contacted on VHF-FM radio channels 13 and 16. Mariners are urged to transit at their slowest safe speed to minimize wake and proceed with caution after passing arrangements have been made with the Dredge Potter.

FOR THE DISTRICT ENGINEER:
