---

**CHANNEL MAINTENANCE DREDGING**  
**USACE Dredge Potter**  
**Upper Mississippi River mile 0 - 300**

1. Commencing on 9 July 2021 and continuing until further notice, the US Army Corps of Engineers Dredge Potter will perform channel maintenance dredging at various locations on the Upper Mississippi River from mile 0 to 300.0.
2. The Dredge Potter has moved to mile 253.5 UMR today, near Red's Landing. Estimating completion on Sunday, 8 August 2021.
3. The next location for the Dredge Potter will be at mile 171 UMR starting on 9 August and completing on 15 August 2021.
4. Updates will be provided as the Dredge Potter completes assignments.
5. The Dredge Potter and its attendant plant, to include tender boats, small boats, barges and pipeline, etc., work 24 hours a day, 7 days a week. When dredging, removed material is pumped through a pontoon pipeline or self-floating pipeline, which may be crossing the channel, and is placed outside of the navigation channel. Mariners should be on the lookout for tender boats, barges, small survey boats, and pipeline when transiting the dredge area.
6. The Dredge Potter may be contacted on VHF-FM radio channels 13 and 16. Mariners are urged to transit at their slowest safe speed to minimize wake and proceed with caution after passing arrangements have been made with the Dredge Potter.

**FOR THE DISTRICT ENGINEER:**
