NOTICE TO NAVIGATION INTERESTS

DATE: 08/12/2021

POC: Lance Engle

NOTICE NUMBER: 14754-3

LOCAL NUMBER: 21-06C

WATERWAY: UPPER MISSISSIPPI

EFFECTIVE: 07/09/2021 08:00 thru 12/31/2021 23:59

CHANNEL MAINTENANCE DREDGING
USACE Dredge Potter
Upper Mississippi River mile 0 - 300

1. Commencing on 9 July 2021 and continuing until further notice, the US Army Corps of Engineers Dredge Potter will perform channel maintenance dredging at various locations on the Upper Mississippi River from mile 0 to 300.0.
2. The Dredge Potter started work at mile 171 on Monday, 9 August, and is estimated to complete on Saturday 14 August.
3. The next location for the Dredge Potter are:
 1. Mile 173 UMR: 15 - 17 August.
 2. Mile 168 - 169 UMR: 18 - 24 August
4. Updates will be provided as the Dredge Potter completes assignments.
5. The Dredge Potter and its attendant plant, to include tender boats, small boats, barges and pipeline, etc., work 24 hours a day, 7 days a week. When dredging, removed material is pumped through a pontoon pipeline or self-floating pipeline, which may be crossing the channel, and is placed outside of the navigation channel. Mariners should be on the lookout for tender boats, barges, small survey boats, and pipeline when transiting the dredge area.
6. The Dredge Potter may be contacted on VHF-FM radio channels 13 and 16. Mariners are urged to transit at their slowest safe speed to minimize wake and proceed with caution after passing arrangements have been made with the Dredge Potter.

FOR THE DISTRICT ENGINEER:
