**NOTICE TO NAVIGATION - RM 185.5 - L&D 27**

All navigation interests are advised that removal of the LD 27 D/S protection cell has been postponed until after 10 Dec 2012. In order to protect the damaged cell from impact, the spud barge will remain until after 10 Dec 2012. Helper boat requirements and availability HAVE CHANGED - SEE NOTICE TO NAVIGATION PN 12-15.

All navigation interests are advised of an obstruction (embedded metal) at the Main Lock lower I-wall bulkhead slot, just below the I-wall miter gate. The embedded metal corner protection on the U/S side of the bulkhead slot protrudes into the lock chamber roughly 3" from the wall. It is considered a hazard to passing tows and all mariners are advised from now until further notice to favor the east wall so as not to rub in this area of the main lock. The district will advise when repairs are made.

The 1200' main lock will be closed for miter gate replacement and embedded metal repairs from 10 Dec 2012 til 1 March 2013. During this time the 600 aux lock will be open and the Government will provide the services of a helper boat to pull cuts from the 600' chamber. The auxiliary lock will have short intermittent closures between 17 Dec 2012 and 31 Dec 2012 to facilitate removal of the damaged protection cell. Specific durations and details will be announced. All navigation interests should be alert for, and abide by, any special instructions that may be issued by the Lockmaster during these timeframes.

**MILE 57.1 - 55.8 - CHANNEL CONDITION/AIDS TO NAVIGATION**

Continuing until further notice, the M/V MISS JENNIE will conduct degrading of stone weirs between approximate Miles 57.1 and 55.8. The work will be at or near the center of the channel. The equipment will move out of the channel to allow traffic to pass. The M/V MISS JENNIE will monitor VHF-FM Channel 68 or via cellular phone at (901) 494-8427. Mariners are urged to contact the M/V MISS JENNIE prior to transiting the area to make passing arrangements. Mariners are urged to transit the area with caution and to proceed at their slowest safe speed.

**Dredge Status**

**Dredge Potter**  
- Dredging at RM 177

**Dredge Hurley**  
- Dredging at RM 41.5 beginning 12/14

**Channel Marker Status**

**Be aware that there may be other buoys off station/missing than the ones mentioned in this report. Mariners should use caution.**

**The Pathfinder is completing a channel patrol heading north.**

**Additional Risks / Concerns**

**All mariners are advised that the Upper Mississippi River Waterways Action Plan Zone 28 (RM 109.9 to RM 185.0) is currently in the extreme low water action phase. Due to low river levels and shifting channels, there is an increase for potential groundings. Transit at a slow speed near fleeting areas. Heavy barges should be placed in the middle of tows. Transit with extreme caution. For additional info, contact the Coast Guard Sector UMR Command Center at 314-269-2332.**

**Stages on the Illinois are near their minimum. Please use considerable caution when navigating on the Illinois River.**

**It is recommended that pilots be mindful of draft, as the river is quite low.**

**As the river falls, rock pinnacles at Thebes increasingly become navigation hazards. It is recommended that in the vicinity of the Thebes bridge, tows stay off the green buoy line. For a view of the rock at Thebes, [Click here](#)**
