Information Paper

Sycamore Springs Wastewater Treatment Facility, MO

Feasibility (CAP Section 14)

Contact:

Matthew Jones, Project Manager
(314) 331-8293
Matthew.A.Jones@usace.army.mil

Location: The Sycamore Springs Wastewater Treatment Facility (WWTF) is located in Jefferson County, Missouri approximately 30 miles southwest of St. Louis along Heads Creek, a tributary to the Big River.

Description: There is erosion occurring along Heads Creek, just upstream of the confluence with an unnamed stream, which is impacting the northwest corner of the treatment plant.

Status: St. Louis District is anticipating Federal Interest Determination (FID) approval in September 2023.

Importance: With project and funding, bank protection would be implemented to protect public infrastructure that provides essential public services from flood and storm damages due to erosion.

Authority: Section 14 of Flood Control Act of 1946 (PL 79-526), as amended.

Schedule:

- Federal Interest Determination: Sept. 2023

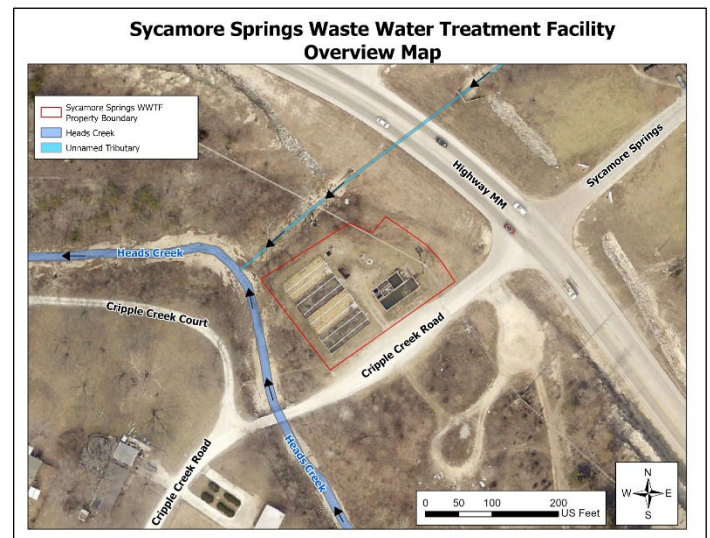

Figure: Sycamore Springs WWTF

Activities for FY24: Complete FID and, if positive, request additional federal funds for FCSA negotiation, PMP, and Review Plan development. Potentially begin feasibility study.

Activities after FY24: If positive FID, continue feasibility study.

Project Sponsor/Customer: The Jefferson County Public Sewer District

Congressional Interest: Senate: Hawley & Schmitt
House: Luetkemeyer (MO-3)

Financial:

Estimated Federal cost: \$50,000
Estimated Non-Federal cost: \$0
Total estimated cost: \$50,000

Total Federal funding to date: \$50,000
