SECTION XII COST ESTIMATES

SECTION XII - COST ESTIMATES

12-01. INTRODUCTION

- a. <u>General</u>. The following table shows preliminary cost estimates for development of proposed new actions at Carlyle Lake. The quantities and costs represent a typical Corps guide specification level of design and materials. During actual detailed design of each element, variations in types and quantities of materials, modifications of facilities, inflationary trends, and results from additional engineering tests, will undoubtedly occur. Costs are based on current prices received for similar items of work in the St. Louis District. Price level is 1996.
- b. <u>Summary of Costs</u>. Cost estimates for the proposed new actions are as follows on page 12-2:
