"navigable waters of the U.S." within RHA jurisdiction (as defined by 33 CFR part 329) in the review area.

• **Complete Table 1 - Required**

NOTE: If the navigable water is not subject to the ebb and flow of the tide or included on the District's list of Section 10 navigable waters list, **DO NOT USE THIS FORM TO MAKE THE DETERMINATION.** The District must continue to follow the procedure outlined in 33 CFR part 329.14 to make a Section 10 RHA navigability determination.

B. CLEAN WATER ACT (CWA) SECTION 404 DETERMINATION OF JURISDICTION: "waters of the U.S." within CWA jurisdiction (as defined by 33 CFR part 328.3) in the review area. Check all that apply.

• **Complete Table 1 - Required**

This AJD includes a case-specific (a)(1) TNW (Section 404 navigable-in-fact) determination on a water that has not previously been designated as such. Documentation required for this case-specific (a)(1) TNW determination is attached.

(a)(2): All interstate waters, including interstate wetlands.

• **Complete Table 2 - Required**

(a)(3): The territorial seas.

Paragraph (b) Excluded Feature/Water Name	Rationale for Paragraph (b) Excluded Feature/Water and Additional Discussion.
(b)(6) Fayette ConAgra Solar Project – Stormwater Control Basin	<p>TRC Companies, on behalf of SolAmerica Energy, LLC, requests a jurisdictional determination on a stormwater basin that exhibits wetland characteristics within a larger 38.43-acre property located at 1001 Brewbaker Drive in St. Elmo, Illinois. Based on the Wetland and Waterway Delineation Report of the project, dated April 5, 2019, the subject 1.429-acre stormwater basin and associated ditches, identified as W-1 in the report, contains each of the three wetland criteria; hydrophytic vegetation, hydrology and hydric soils. SolAmerica Energy, LLC is proposing to install approximately 8-acres of solar panels and associated support structures, partially within the subject basin, by imbedding steel piles directly into the basin substrate. No other fill or dredged material will be placed into the basin.</p> <p>Based on aerial imagery, the subject stormwater basin was constructed as part of a facility expansion between the Fall 2012 and Fall 2015 within a upland grassland and/or fallow farm field setting. Historically, the site was an active agricultural field. The water feature was not identified on the U.S. Geological Survey 7.5-minute topographic maps, the National Wetlands Inventory, or FEMA floodplain maps. Based on the Corps evaluation of the stormwater basin, it has been considered an excluded water (b)(6) under the 2015 Waters of the U.S. Rule. Excluded water (b)(6) includes “Stormwater control features constructed to convey, treat, or store stormwater that are created in dry land.”</p>
