APPROVED JURISDICTIONAL DETERMINATION FORM (INTERIM)  
NAVIGABLE WATERS PROTECTION RULE**

**I. ADMINISTRATIVE INFORMATION**

Completion Date of Approved Jurisdictional Determination (AJD): 9/15/2020  
 ORM Number: MVS-2020-438  
 Associated JDs: NA  
 Review Area Location<sup>1</sup>: State/Territory: MO City: Wentzville County/Parish/Borough: St. Charles  
 Center Coordinates of Review Area: Latitude 38.8091 Longitude -90.8758

**II. FINDINGS**

**A. Summary:** Check all that apply. At least one box from the following list MUST be selected. Complete the corresponding sections/tables and summarize data sources.

- The review area is comprised entirely of dry land (i.e., there are no waters or water features, including wetlands, of any kind in the entire review area). Rationale: N/A or describe rationale.
- There are “navigable waters of the United States” within Rivers and Harbors Act jurisdiction within the review area (complete table in Section II.B).
- There are “waters of the United States” within Clean Water Act jurisdiction within the review area (complete appropriate tables in Section II.C).
- There are waters or water features excluded from Clean Water Act jurisdiction within the review area (complete table in Section II.D).

<sup>1</sup> Map(s)/figure(s) are attached to the AJD provided to the requestor.

<sup>2</sup> If the navigable water is not subject to the ebb and flow of the tide or included on the District’s list of Rivers and Harbors Act Section 10 navigable waters list, do NOT use this document to make the determination. The District must continue to follow the procedure outlined in 33 CFR part 329.14 to make a Rivers and Harbors Act Section 10 navigability determination.

<sup>3</sup> A stand-alone TNW determination is completed independently of a request for an AJD. A stand-alone TNW determination is conducted for a specific segment of river or stream or other type of waterbody, such as a lake, where upstream or downstream limits or lake borders are established. A stand-alone TNW determination should be completed following applicable guidance and should NOT be documented on the AJD Form.

**D. Excluded Waters or Features**

Excluded waters ((b)(1) – (b)(12)): <sup>4</sup>				
Exclusion Name	Exclusion Size		Exclusion <sup>5</sup>	Rationale for Exclusion Determination
Wetland D	0.070	acre(s)	(b)(1) Non-adjacent wetland.	The wetlands are emergent. They receive water flow through a drainage swale that flows into Wetland E. A drainage swale also carries water flow out of Wetland E and into Wetland D. In addition, there is a second drainage swale that provides water to Wetland D. There is a drainage swale that then carries water from Wetland D to an unnamed tributary, which is ultimately a drainage to the Mississippi River.
Wetland E	0.029			

**III. SUPPORTING INFORMATION**

**A. Select/enter all resources** that were used to aid in this determination and attach data/maps to this document and/or references/citations in the administrative record, as appropriate.

Information submitted by, or on behalf of, the applicant/consultant: [Crawford, Murphy & Tilly submitted a delineation dated June 30, 2020.](#)

This information is sufficient for purposes of this AJD.

Rationale: [The submittal is sufficient for an AJD determination. Photos, maps and data sheets were provided. The Corps has reviewed and concurs with the submittal.](#)

**B. Typical year assessment(s):** [Typical Year](#)

<sup>4</sup> Some excluded waters, such as (b)(2) and (b)(4), may not be specifically identified on the AJD form unless a requestor specifically asks a Corps district to do so. Corps districts may, in case-by-case instances, choose to identify some or all of these waters within the review area.

<sup>5</sup> Because of the broad nature of the (b)(1) exclusion and in an effort to collect data on specific types of waters that would be covered by the (b)(1) exclusion, four sub-categories of (b)(1) exclusions were administratively created for the purposes of the AJD Form. These four sub-categories are not new exclusions, but are simply administrative distinctions and remain (b)(1) exclusions as defined by the NWPR.

**C. Additional comments to support AJD:** *The drainage patterns that flow into and out of Wetlands D and E are considered non-jurisdictional, do not have defined bed and banks. As such, the identified wetlands are determined to be non-adjacent wetlands.*
