Review Area Location¹: State/Territory: Missouri City: Bowling Green County/Parish/Borough: Pike

Center Coordinates of Review Area: Latitude 39.3590 Longitude -91.2370

II. FINDINGS

A. Summary: Check all that apply. At least one box from the following list MUST be selected. Complete the corresponding sections/tables and summarize data sources.

- The review area is comprised entirely of dry land (i.e., there are no waters or water features, including wetlands, of any kind in the entire review area). Rationale: N/A or describe rationale.
- There are “navigable waters of the United States” within Rivers and Harbors Act jurisdiction within the review area (complete table in Section II.B).
- There are “waters of the United States” within Clean Water Act jurisdiction within the review area (complete appropriate tables in Section II.C).
- There are waters or water features excluded from Clean Water Act jurisdiction within the review area (complete table in Section II.D).

Stream 2 is located within a 652-acre watershed drainage basin within the project area and flows into Peno Creek, which flows into the Salt river, a tributary to the Mississippi river.

¹ Map(s)/figure(s) are attached to the AJD provided to the requestor.

² If the navigable water is not subject to the ebb and flow of the tide or included on the District’s list of Rivers and Harbors Act Section 10 navigable waters list, do NOT use this document to make the determination. The District must continue to follow the procedure outlined in 33 CFR part 329.14 to make a Rivers and Harbors Act Section 10 navigability determination.

³ A stand-alone TNW determination is completed independently of a request for an AJD. A stand-alone TNW determination is conducted for a specific segment of river or stream or other type of waterbody, such as a lake, where upstream or downstream limits or lake borders are established. A stand-alone TNW determination should be completed following applicable guidance and should NOT be documented on the AJD Form.

Tributaries ((a)(2) waters):				
(a)(2) Name	(a)(2) Size		(a)(2) Criteria	Rationale for (a)(2) Determination
			surface water flow directly or indirectly to an (a)(1) water in a typical year.	Peno Creek which flows into the Salt river, a tributary to the Mississippi river.
Stream 9	1,407	linear feet	(a)(2) Intermittent tributary contributes surface water flow directly or indirectly to an (a)(1) water in a typical year.	Stream 9 is located within a 186-acre watershed drainage basin within the project area and flows into Peno Creek, which flows into the Salt river, a tributary to the Mississippi river.

D. Excluded Waters or Features

Excluded waters ((b)(1) – (b)(12)): ⁴				
Exclusion Name	Exclusion Size		Exclusion ⁵	Rationale for Exclusion Determination
Wetland 1	.375	acre(s)	(b)(1) Non-adjacent wetland.	Wetland does not meet the (a)(4) criteria as waters of the US, connection to (a)(2) tributary is ephemeral.
Wetland 2	.365	acre(s)	(b)(1) Non-adjacent wetland.	Isolated wetland that does not meet the (a)(4) criteria as waters of the US.
Wetland 3	.461	acre(s)	(b)(1) Non-adjacent wetland.	Isolated wetland that does not meet the (a)(4) criteria as waters of the US.
Wetland 4	.005	acre(s)	(b)(1) Non-adjacent wetland.	Isolated wetland that does not meet the (a)(4) criteria as waters of the US.
Stream 1	402.7	linear feet	(b)(3) Ephemeral feature, including an ephemeral stream, swale, gully, rill, or pool.	Conveys surface water in direct response to precipitation only.
Stream 3	190.2	linear feet	(b)(3) Ephemeral feature, including an ephemeral	Conveys surface water in direct response to precipitation only.

⁴ Some excluded waters, such as (b)(2) and (b)(4), may not be specifically identified on the AJD form unless a requestor specifically asks a Corps district to do so. Corps districts may, in case-by-case instances, choose to identify some or all of these waters within the review area.

⁵ Because of the broad nature of the (b)(1) exclusion and in an effort to collect data on specific types of waters that would be covered by the (b)(1) exclusion, four sub-categories of (b)(1) exclusions were administratively created for the purposes of the AJD Form. These four sub-categories are not new exclusions, but are simply administrative distinctions and remain (b)(1) exclusions as defined by the NWPR.
