Public Notice No.

P-3101

Public Notice Date

July 13, 2018

Expiration Date

August 03, 2018

Postmaster Please Post Conspicuously Until:

File Number: MVS-1988-31682

Interested parties are hereby notified that an application has been received for a Department of the Army permit for certain work in waters of the United States, as described below and shown on the attached maps.

COMMENTS AND ADDITIONAL INFORMATION: Comments on the described work should reference the U.S. Army Corps of Engineers File Number shown above and must reach this office no later than the above expiration date of the Public Notice to become part of the record and be considered in the decision. Comments should be mailed to the following address:

U.S. Army Corps of Engineers
(Regulatory Branch)
1222 Spruce Street
St. Louis, Missouri 63103-2833
ATTN: Alan Edmondson

APPLICANT: Consolidated Grain and Barge, Inc., 2133 E. Highway AB, Scott City, Missouri 63780 (573) 264-2411, and Southeast Missouri Regional Port Authority, 10 Bill Bess Drive, Scott City, Missouri 63780 (573) 264-4045.

LOCATION: A proposal to perform maintenance dredging activities would take place adjacent to the Consolidated Grain and Barge, Inc. facility, located along the right descending bank of the Mississippi River at approximate River mile 47.9. A proposed in-river dredge disposal site is located along the right descending bank of the Mississippi River, just downstream of the dredged area, at approximate River mile 47.8. All portions of the project are located in Cape Girardeau County, Missouri.

PROJECT DESCRIPTION: The proposed dredging areas are located adjacent to the Consolidated Grain and Barge (CGB) facility at approximate River mile 47.9. CGB has encountered low water problems during the past several years. CGB proposes to contract the services of a hydraulic dredge vessel to remove approximately 40,000 cubic yards of accumulated silt, sand, sediment, rock, and/or debris with associated open water disposal. The applicant anticipates subsequent dredging on an average three to five year dredging cycle. The first dredge area is located downstream of Dike 47.9, near Old Dock, on Rushing Road. The area to be dredged is approximately 200 feet by 300 feet. The second dredge area is located just downstream, at the CGB, Inc. elevator. This dredge area is approximately 300 feet both upstream and downstream of the elevator and spans approximately 300 feet in width. The dredged material will be directed into the Mississippi River to its proposed open water disposal site, just downstream of the facility. The disposal site is in the same general location as the currently authorized Corps channel maintenance disposal site. Sedimentation patterns and available river depths would primarily determine the need for maintenance dredging. Without adequate river depths, the applicant may be unable to continue barge loading/offloading operations at low river stages.

NOTE: There are no proposed changes to the existing permit, P-2410, which was issued previously.

LOCATION MAPS AND DRAWINGS: See attached.

ADDITIONAL INFORMATION: Additional information may be obtained by contacting Alan Edmondson, Project Manager, U.S. Army Corps of Engineers, at (314) 331-8811. Your inquiries may also be sent by electronic facsimile to (314) 331-8741 or by e-mail to Alan.Edmondson@usace.army.mil

AUTHORITY: This permit will be processed under the provisions of Section 10 of the Rivers and Harbors Act of 1899 (33 U.S.C. 403) and Section 404 of the Clean Water Act (33 U.S.C. 1344).

PUBLIC HEARING: Any person may request, in writing, within the comment period specified in this notice, that a public hearing be held to consider the applicant's proposal. Any request for a public hearing shall state, with particularity, the reason for the hearing, and must be based on issues that would warrant additional public review.

ENDANGERED SPECIES: A preliminary determination, in compliance with the Endangered Species Act, as amended, has been made that the work that is proposed would not affect species designated as threatened or endangered, or adversely affect critical habitat. Therefore, no formal consultation request has been made to the United States Department of Interior, Fish and Wildlife Service. In order to complete our evaluation, comments are solicited from the Fish and Wildlife Service and other interested agencies and individuals through this Public Notice.

CULTURAL RESOURCES: The St. Louis District will evaluate information provided by the State Historic Preservation Officer and the public in response to this public notice and we may require a reconnaissance survey of the project area.

EVALUATION: The decision whether to issue a permit will be based on an evaluation of the probable impact including cumulative impacts of the described activity on the public interest. That decision will reflect the national concern for both protection and utilization of important resources. The benefit that may reasonably be expected to accrue from the described activity must be balanced against its reasonably foreseeable detriments. All factors, which may be relevant to the activity described, will be considered including the cumulative effects. Among factors considered are: conservation; economics; aesthetics; general environmental concerns; wetlands; historic properties; fish and wildlife values; flood hazards; flood plain values; land use; navigation; shoreline erosion and accretion; recreation; water supply and conservation; water quality; energy needs; safety; food and fiber production; mineral needs; consideration of property ownership; and in general the needs and welfare of the people.

SOLICITATION OF COMMENTS: The U.S. Army Corps of Engineers is soliciting comments from the public; Federal, state, and local agencies and officials; Indian Tribes; and other interested parties in order to consider and evaluate the impacts of the proposed activity. Any comments received will be considered by the U.S. Army Corps of Engineers to determine whether to issue, modify, condition or deny a permit for this proposal. To make this decision, comments are used to assess impacts on endangered species, historic properties, water quality, general environmental effects, and other public interest factors listed above. Comments are used in the preparation of an Environmental Assessment and/or an Environmental Impact Statement pursuant to the National Environmental Policy Act.

Comments are also used to determine the need for a public hearing and to determine the overall public interest of the proposed activity.

for DANNY D. MCCLENDON
Chief, Regulatory Branch
2

NOTICE TO POSTMASTERS:

It is requested that this notice be conspicuously and continually placed for 21 days from the date of this issuance of this notice.
